

# Blue Whale Project

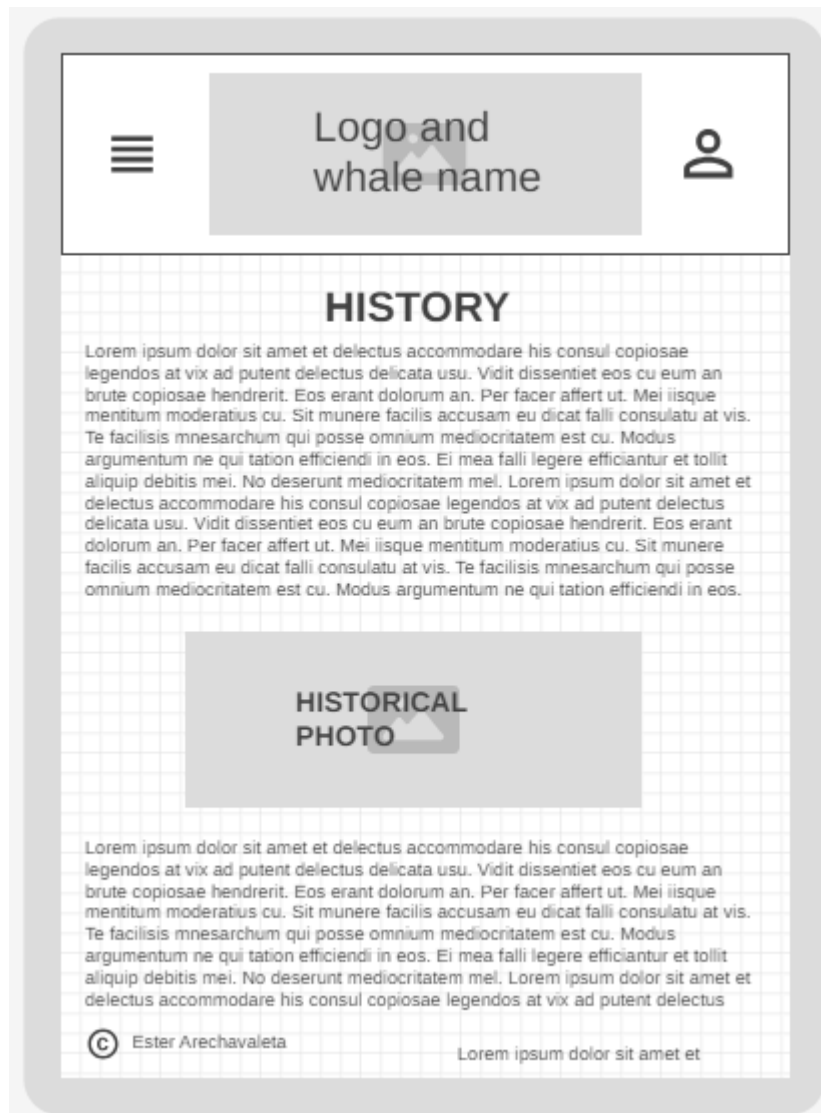

Mobile version:

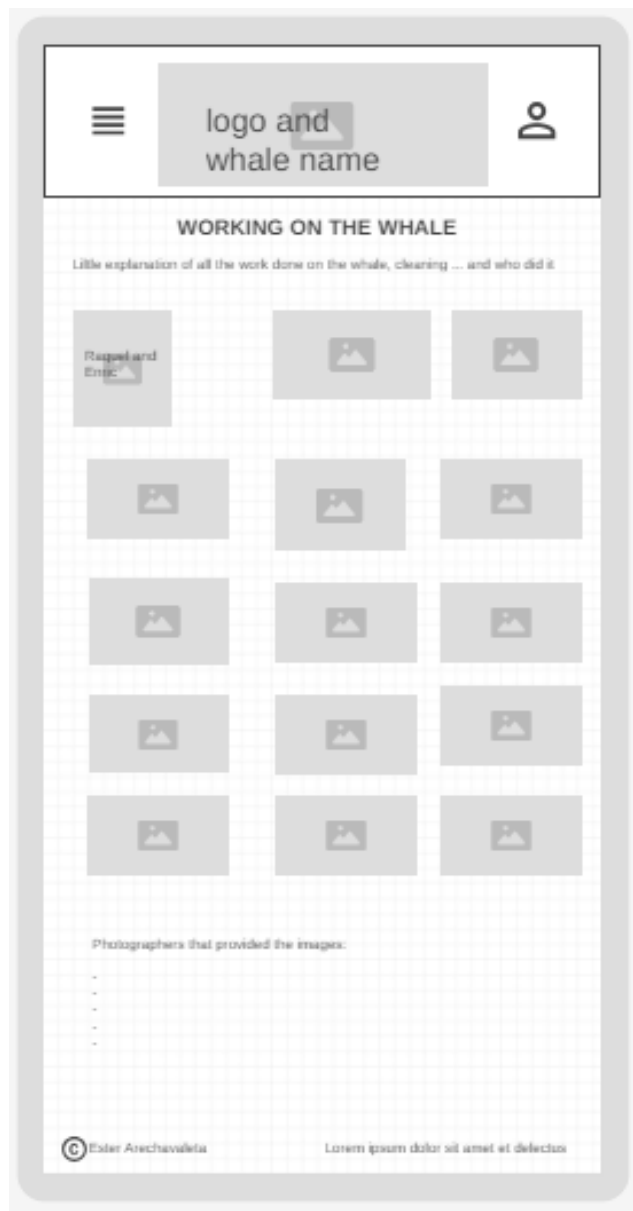

On the homepage, there will be, at the top, the menu, logo with the whale name and the login, in case the user has the required permissions to be able to enter infocards and news.

At the body, there will be the interactive 3D Model of the blue whale as the main thing.

Just underneath it, there will be a little bit of text, with the beginning of its story to catch the user's attention, and a link right at the end to the page with the whole of its history.

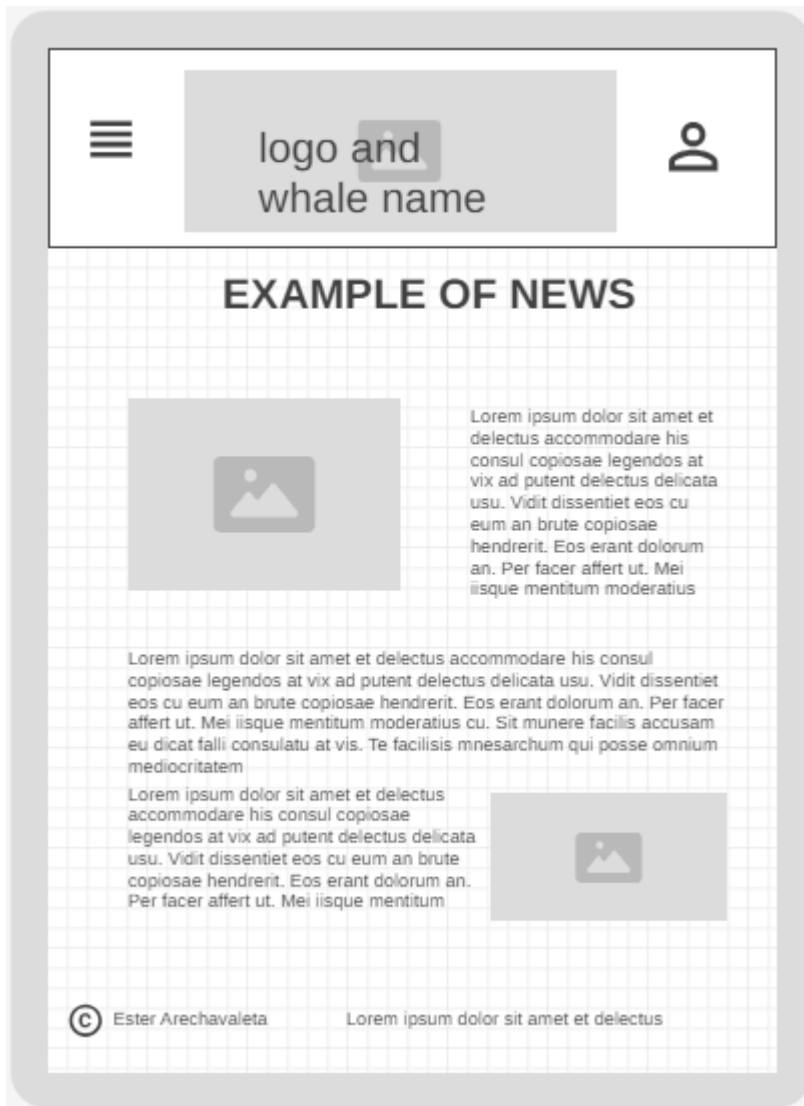

When the user clicks on SEE MORE at the end of the homepage, or goes to the HISTORY page on the menu, they will go to this page, where they can read it's history with the historical photos embedded in between. As we do not know yet how long the text will be, I have just put one page, but they will be able to scroll down if needed.

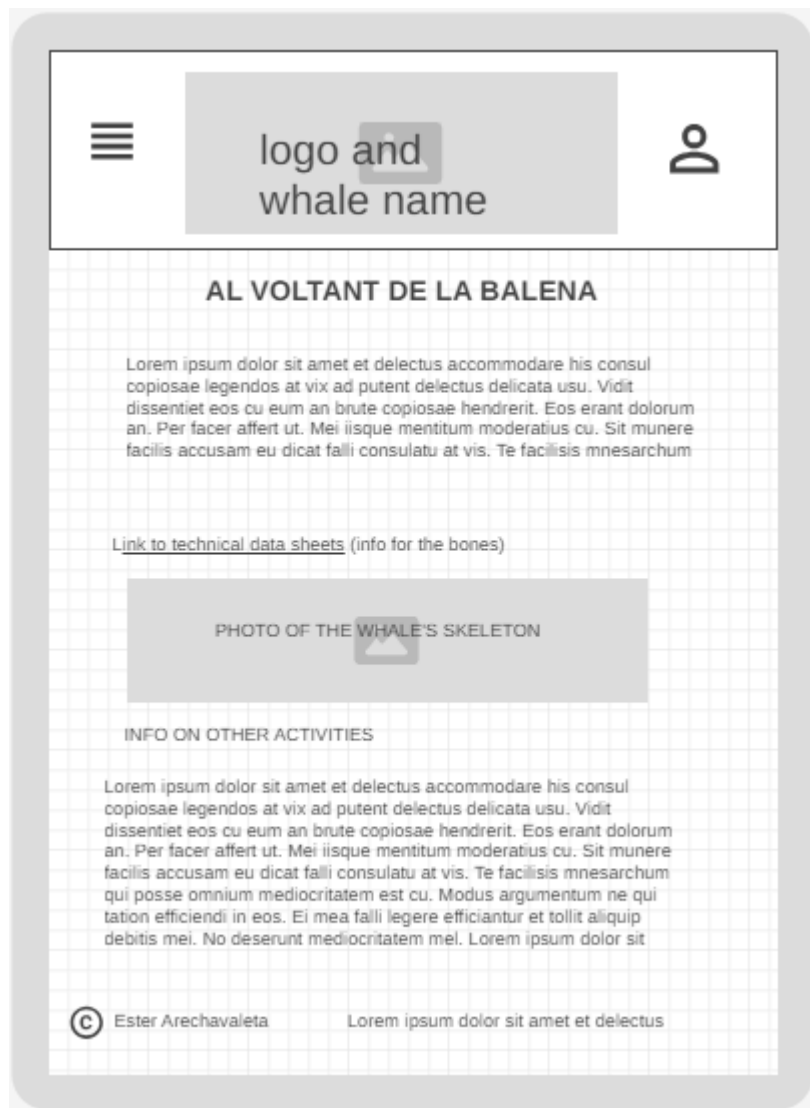

At this section of the menu, there will be the photos taken, with the names of the photographers at the bottom, with a little explanation of who did what. Also there is a hover over every photo to maximize it.

At the news section, there will be a carousel with a little image with a resume of the news and the main image, so the user can see the previous and the next, and if they click on the image, user would be redirected to a page with the news. This page will have the whole text with as many photographs as needed.

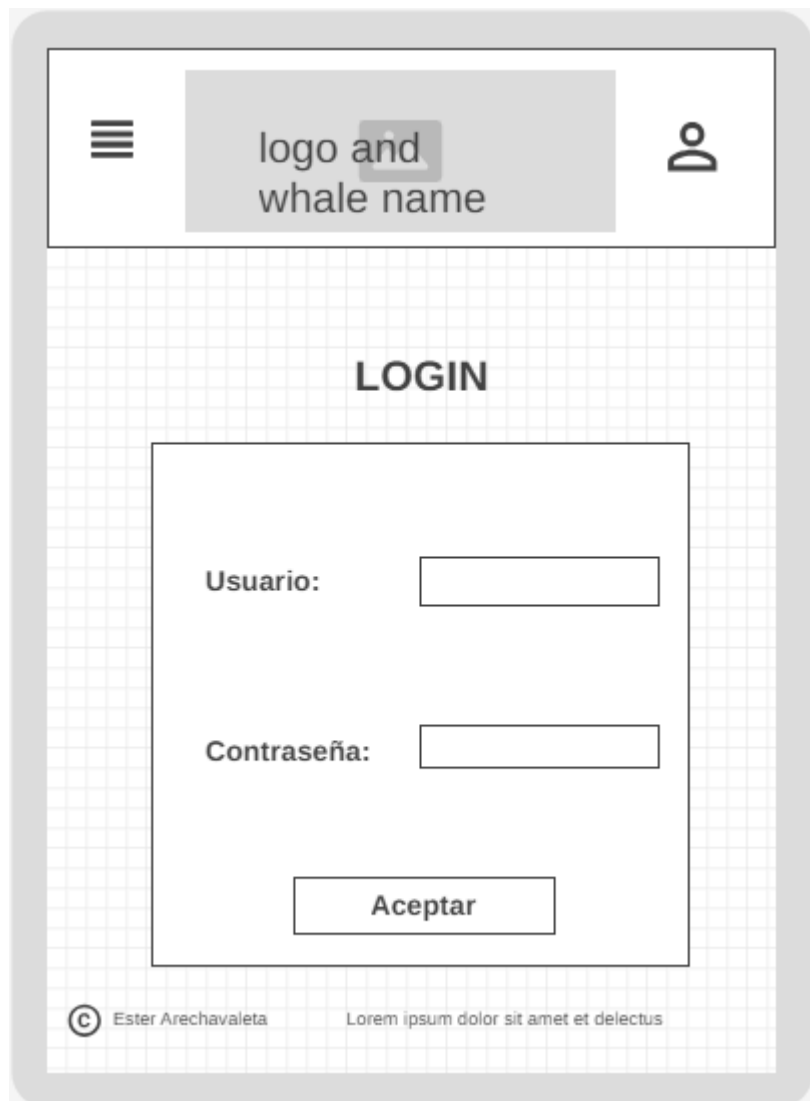

This is an example of how a news report would be, there would be one for each news available at the site.

At his page we would show a text first, explaining about the data sheets, who wrote them... and then a link to a page showing them.

Underneath it, there is info on the other activities, but as we do not know what it is going to be, I have left the space to use.

A wireframe of a login page. At the top, there is a header bar with a hamburger menu icon on the left, a central area labeled "logo and whale name" with a placeholder image, and a user icon on the right. Below the header, the word "LOGIN" is centered. The main content area contains a form with two input fields: "Usuario:" and "Contraseña:", each followed by a text box. Below these fields is a button labeled "Aceptar". At the bottom left, there is a copyright notice "© Ester Arechavaleta" and at the bottom right, a line of placeholder text "Lorem ipsum dolor sit amet et delectus".

## LOGIN

Usuario:

Contraseña:

© Ester Arechavaleta Lorem ipsum dolor sit amet et delectus

The login page is for the users that have credentials for inserting data sheets, news or both in case they want to do it. The only difference with a normal user would be that at entering at the menu, the logged users will have extra lines, depending on the permissions they have.

The menu for the logged in will show just the extra lines of insert data sheet and/or insert news. The admin menu would show another line for inserting or updating user.
