

	IES JOAN RAMIS I RAMIS Departament d'Informàtica	UD1: Graphic user interface design principles
	Web interface design	CFGGS DAW – 2nd course

UD1. Activity 4

Following what we have seen in this unit you need to create a style guide for the website you have designed on activity 3.

This style guide must contain the following (**pdf** format):

- **Front page** with the name of your website and main logo.
- **Index**
- **The brand and logo** (with different variations and for dark and clear backgrounds).
- **Typography**
- **Colour palette**
- **Structure and spacing rules**
- **Icons**
- **Guidelines for illustrations and images.** You have to specify the size or image ratio for each part of your project.
- **Style of the interface elements:** examples on how a button, input, the menus or other elements will look like.

Examples:

- [Ajuntament de Barcelona](#)
- [Portales dependientes de la región de Murcia](#)
- [Universidad de Málaga](#)
